PROJECTS

Automatic Language Detection

Skills: Python, Scikit-learn, FastAPI, Docker, Render

- In this project, I developed a language detection system to identify the language of text data from a set of languages, including major European and Asian languages such as Arabic, English, Hindi, and Russian.
- Used FastAPI to create a web API, allowing users to interact with the model.
- Used Docker for containerization, ensuring consistent and isolated execution environments.
- Deployed the project on Render (a cloud-based platform), making it accessible through a web interface.

Spotify Recommendation System

Skills: Python 3, Pandas, NumPy, Scikit-learn, FastAPI

- In this project, I've built an spotify recommendation system to individual preferences.
- To do this, I performed various tasks, including Feature engineering, Exploratory Data Analysis (EDA), fetching data using Spotify Web APIs and Model development.
- Used FastAPI to create a web API, allowing users to interact with the model.
