## Education

### Ganapathy Engineering College

Sept 2021 - July 2024

B.Tech in Computer Science and Engineering (AI & ML)

- GPA: 7.01/10.0
- **Coursework:** Data Structures, Algorithms, Machine Learning, Deep Learning

## Skills

**Languages:** Python (3 years), SQL (2 years), Bash (3 years)

**Technologies:** AWS(EC2, ECR, S3, Lambda), LangChain, MLFlow, Docker, GitHub Actions, CI/CD pipelines, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, FastAPI, Flask, Streamlit, Git, DVC

## Experience

### Data Science Intern

Remote

[Innomatics Research Labs](#) 🔗

Sep 2024 – Dec 2024

- Developed and deployed machine learning models for diamond price prediction, achieving 98% accuracy.
- Implemented MLOps workflows with MLFlow and Docker for scalable model deployment.
- Led a 6-member team to develop GenAI-powered Discord bots for text and image generation.
- Authored and published two in-depth Medium articles, "Hacking the System Design" and "Evolution of Language Representation Techniques," covering advanced concepts like search engine architectures, distance metrics, language vectorization techniques, and embeddings.

## Projects

### Diamond Price Prediction (Internship Project) - [GitHub](#) 🔗

Oct 2024 - Oct 2024

- Developed a machine learning model to predict diamond prices based on features like carat, cut, color and clarity. Automated MLOps pipeline with stages for Data Ingestion, Validation, Transformation, Model Training, Evaluation and Prediction. Deployed the app on AWS EC2 for production use.

### Chat With Multiple PDFs (Personal Project) - [GitHub](#) 🔗

Sep 2024 - Sep 2024

- Built a Streamlit-based application enabling users to upload multiple PDFs and interact with their content through natural language queries, leveraging LangChain, Google Generative AI (Gemini) and FAISS (Facebook AI Similarity Search) for accurate, context-based question answering.

### Text Summarizer App (Personal Project) - [GitHub](#) 🔗

Aug 2024 - Sep 2024

- Developed a Text Summarization App that summarizes any text, dialogue, conversation, or article. Utilized the Pegasus model and fine-tuned it with the SAMSum dataset. The results were impressive, successfully summarizing a chat between my friend and me into a concise and clear summary.

## Publications & Achievements

### Evolution of Language Representation Techniques
