PROJECTS

Boston House Pricing

Skills: Python, Scikit-learn, Pandas, NumPy, Docker, Render

- In this project, I built an machine learning model that predict the house price.
- Conducted tasks such as Data cleaning, EDA, Data preprocessing and Model development.
- Built a Docker image and pushed it to Docker Hub. To access the image, use "docker pull codewithcharan/bostonhousepricing:flask"
- Deployed it on Render cloud platform as a container.

Spotify Recommendation System

Skills: Python 3, Pandas, NumPy, Scikit-learn, FastAPI

- In this project, I've built an spotify recommendation system to individual preferences.
- Users can input their favorite song name and year, it will provide a list of music recommendations based on their preferences.
- To do this, I performed various tasks, including Feature engineering, Exploratory Data Analysis (EDA), fetching data using Spotify Web APIs, Model development and Model serving using FastAPI
