Education

Ganapathy Engineering College   Sept 2021 - July 2024
B.Tech in Computer Science and Engineering (AI & ML)
- GPA: 7.01/10.0
- **Coursework:** Data Structures, Algorithms, Machine Learning, Deep Learning

Skills

Languages: Python (3 years), SQL (2 years), Bash (3 years)

Technologies: AWS(EC2, ECR, S3, Lambda), LangChain, LlamaIndex, ChromaDB, RAG(Retrieval-Augmented Generation), Docker, Hugging Face, TensorFlow, PyTorch, FastAPI, Flask, Streamlit, Git

Experience

Data Science Intern   Remote
Innomatics Research Labs ↗   Sep 2024 – Dec 2024
- Developed and deployed machine learning models for diamond price prediction, achieving 98% accuracy.
- Implemented MLOps workflows with MLFlow and Docker for scalable model deployment.
- Led a 6-member team to develop GenAI-powered Discord bots for text and image generation.
- Authored and published two in-depth Medium articles, "Hacking the System Design" and "Evolution of Language Representation Techniques," covering advanced concepts like search engine architectures, distance metrics, language vectorization techniques, and embeddings.

Projects

Pharmaceutical Insight Retrieval System (Personal Project) - GitHub ↗   Jan 2025 - Jan 2025
- Developed an advanced Retrieval-Augmented Generation (RAG) pipeline with similarity search for precise query responses. It is designed to help users gain meaningful insights from research papers and documents in the pharmaceutical domain. It uses LangChain, Google Gemini, ChromaDB and Streamlit.

Boa-AI (Team Project) - Boa-Demo ↗   Nov 2024 - Dec 2024
- Boa is a GenAI-powered Discord bot designed to interact with users in a friendly and intelligent manner. It uses LangChain, Google Gemini API, and ChromaDB to store and retrieve past conversations, providing contextual and thoughtful responses. The bot uses Retrieval-Augmented Generation (RAG) to generate accurate answers and stores user interactions for future reference.

Vision-AI (Internship Project) - GitHub ↗   Nov 2024 - Nov 2024
- Vision-AI is designed to assist visually impaired individuals in understanding their surroundings. It provides real-time scene analysis, obstacle detection, text-to-speech conversion, and personalized task assistance.
